OpsGrat Version 3.0.6

ID

The image shows a screenshot of the OpsGrat 3.0.6 web application interface. The main content area is titled '作业管理' (Job Management). It features a table with columns: ID, 模板 (Template), 作业类型 (Job Type), 执行人 (Executor), 主机清单 (Host List), 凭据名称 (Credential Name), 开始时间 (Start Time), 完成时间 (End Time), 状态 (Status), and 操作 (Actions). A red box highlights a specific job entry with ID 1753, which is a 'workflow' template executed by '普通管理员' (Common Administrator) on a host '华为云主机' (Huawei Cloud Host) using a '泛汐服务器 (root用户名密码)' (Fanyixi Server (root username and password)) credential. The job status is '失败' (Failed). Below the main table, there is a modal view showing details for the selected job, including its ID, template, job type, executor, host list, start time, end time, status, and actions. The interface also includes a sidebar with navigation options like 'Dashboard', '自动化管理' (Automation Management), '资源管理' (Resource Management), '模板管理' (Template Management), '通知管理' (Notification Management), and '系统管理' (System Management). The top navigation bar shows the user is logged in as 'OpsGrat' and has access to 'SSO', '帮助' (Help), and '登出' (Logout).

Version 3.0.6

SSO

The top screenshot shows the 'OpsGrat' web interface. The left sidebar contains navigation links: Dashboard, 自动化管理, 资源管理, 模板管理 (selected), 作业模板, 工作流模板, 通知管理, and 系统管理. The main content area is titled '授权团队' (Authorize Team) and displays a table with the following data:

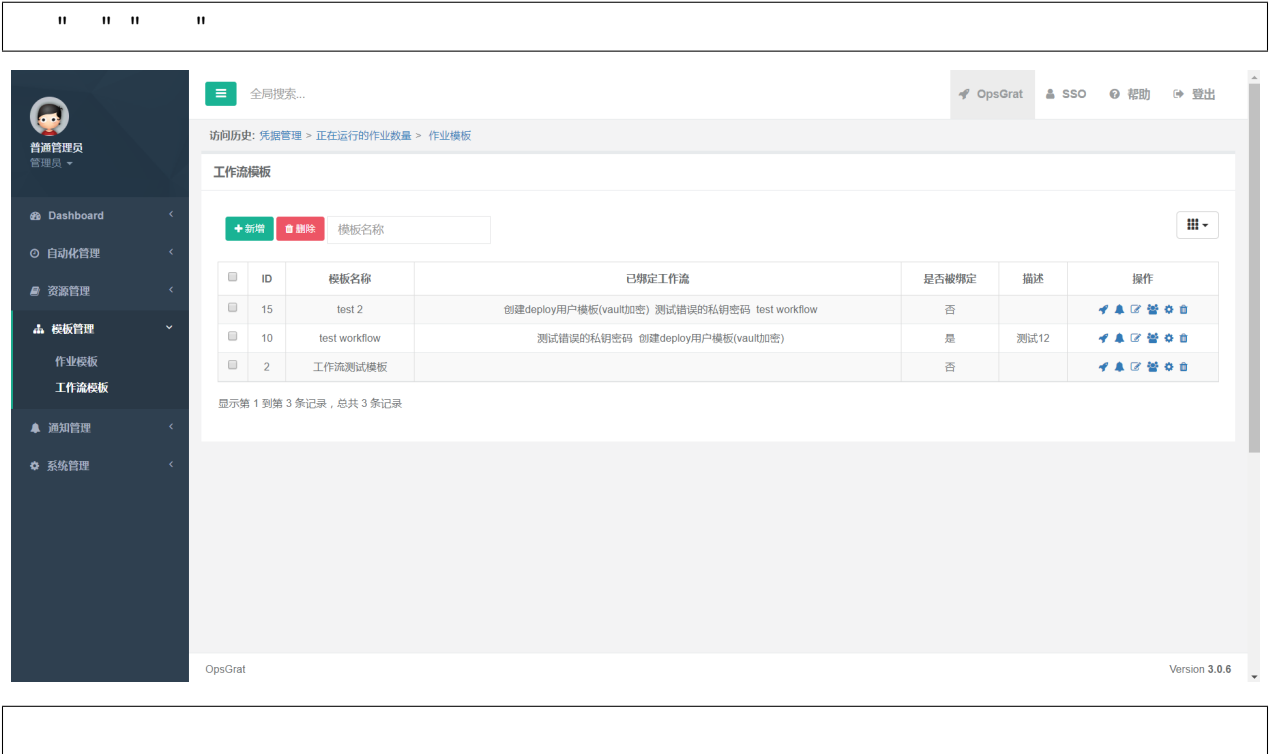

ID	团队名称	模板名称	权限	操作
5	前端	创建目录&文件	管理	编辑 删除

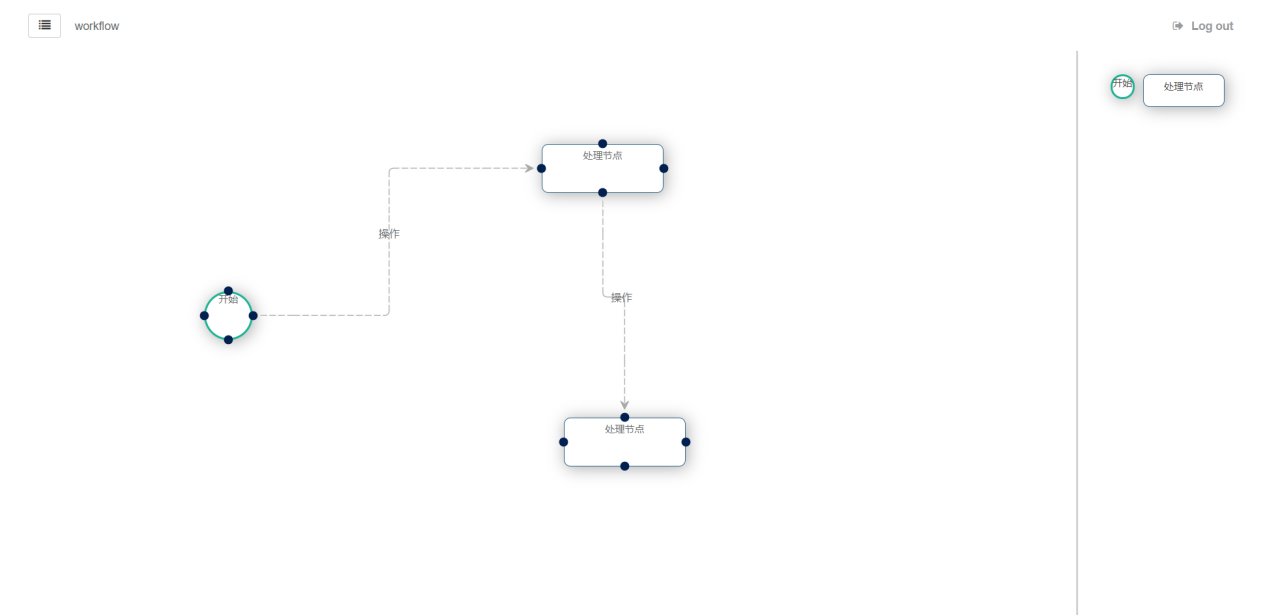

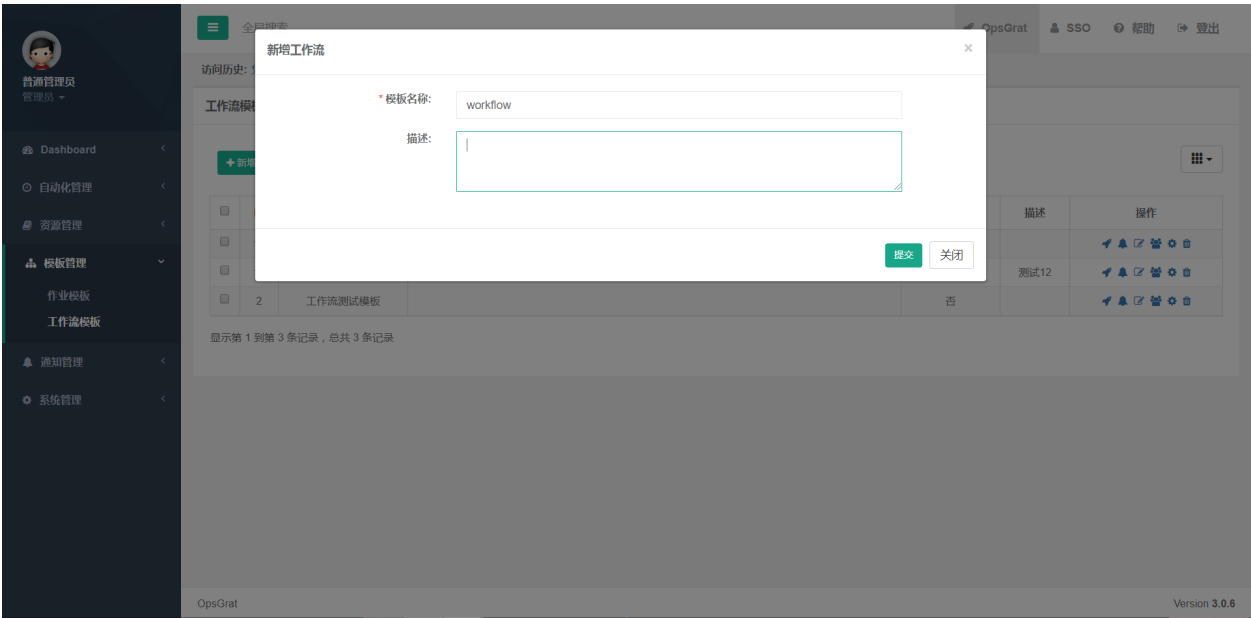

Below the table, it says '显示第 1 到第 1 条记录，总共 1 条记录' (Displaying 1 to 1 records, total 1 records). A red box highlights the '团队名称' column.

The bottom screenshot shows the same interface, but with a confirmation dialog box in the center. The dialog box contains the text '请确认！' (Please confirm!) and '确定要删除该数据吗？' (Are you sure you want to delete this data?). There are two buttons: '确认' (Confirm) and '取消' (Cancel). A red arrow points to the '确认' button.

3.2 Tomcat

3.2.1 Tomcat playbook

- 1.1 tomcat-install tomcat-install roles
- 1.2 tomcat roles

1. Ansible Galaxy <https://galaxy.ansible.com> tomcat
2. roles tomcat-ansible-role
3. tomcat-ansible-role github roles

The screenshot shows the Ansible Galaxy search results for 'tomcat'. The search bar at the top contains 'tomcat' and shows 167 results. The results list three roles:

- tomcat-ansible-role** by zaxos: Ansible role to install and configure Apache Tomcat on CentOS/RHEL. It has a 5/5 score, 9973 downloads, and is built passing. A red arrow points to the role name.
- tomcat-role** by idealista: Tomcat role. It has a 3.9/5 score, 22999 downloads, and is built failing.
- tomcat** by robertdebock: Install and configure tomcat on your system. It has a 5/5 score, 1047 downloads, and is built passing.

On the right side, there is a 'Popular Tags' section with the following tags and counts:

Tag	Count
system	5,925
development	2,904
web	2,443
monitoring	1,312
networking	1,063
database	1,019
cloud	951
packaging	796
ubuntu	750
docker	738

The screenshot shows the details page for the 'tomcat-ansible-role' by zaxos. The role description is 'Ansible role to install and configure Apache Tomcat on CentOS/RHEL'. It has a 5/5 score and 9974 downloads. A red arrow points to the 'GitHub Repo' button.

Below the role details, there is an 'Info' section with the following information:

- Minimum Ansible Version:** 2.3
- Installation:** `$ ansible-galaxy install zaxos.tomcat-ansible-role`
- Last Commit:** 4 months ago
- Last Import:** 17 days ago
- Tags:** java, system, tomcat, web

On the right side, there is a 'Content Score' section with the following information:

- Quality Score:** 5/5 (Last scored 17 days ago, [Show Details](#))
- Community Score:** No Surveys, 0/5 (Based on 0 surveys, [Show Details](#))

Below the scores, there is a 'Tell us about this role' section with a survey:

- Quality of docs? (5 stars)
- Ease of use? (5 stars)
- Does what it promises? (Y/N)
- Works without change? (Y/N)

- 1.3 tomcat-ansible-role-master.zip tomcat-install/roles tomcat
- 1.4 tomcat-install main.yml
